Subject: Lake question

Mr Mandaville,

I am an environmental science student at Dalhousie University and I will be starting my thesis project over the summer.

I am planning on comparing the water quality of two lakes in the Halifax area that are about the same size and are in the same watershed. I want to determine the impacts of human activity on the lakes by testing one lake that has homes and roads in close proximity and one that does not.

I would like to visit lakes on which these types of tests have not been conducted. I am writing to inquire if you have any suggestions of lakes that might be suitable for this type of project.

Thank you for your time,

Carla Seewald
