Subject: water testing?

Dear Mr. Mandaville,

My name is Katelyn Abarbanel, and I'm a grade 12 chemistry student. Me and my lab partner, Nicole, are doing a project on water testing, and we were wondering if you have more extensive data on lakes in HRM than is outlined on your website. We're especially interested in metal content and pH of the water and would like to compare our findings with data that has already been gathered, if possible. We live in the Spryfield area and wish to test Chocolate Lake, Williams Lake, Colpitt Lake, Purcell's Pond, Long Lake and Kidston Lake. If you can help us we'd be extremely grateful.

Thanks for your time,
Katelyn
